Switch Covers - Glow In The Dark

GLSWCOV

The ingenious Glow in the Dark Light Switch; expose it to natural or artificial light for minutes and it glows for hours - perfect for guiding you to the light switch during the night. Whatever the reason for your night-time manoeuvres, whether taking a trip to the loo, or getting ready for an early shift at work, the glowing switch will ensure you get the lights on without first walking into the wardrobe or tripping over the chest of drawers.

It is even a light source in its own right - use it to get your bearings as you move around a dark room. And if you have a child who is afraid of the dark, the light switch is the perfect way to wean them off having the light on all night. Fit the switch in their room, and the constant soft green glow will comfort them until they drop off to sleep.

It's easy to fit, is compatible with almost all light switches, and after being exposed to natural or artificial light will glow all night long.
