Telescopic Flashlight With Magnet

TELEFLASH

There's more to this slim-line aluminium flashlight than meets the eye! Thanks to its telescopic neck, it extends to just over half a metre in length! Not only that, there's a magnet fitted within the torch head - perfect for fishing keys out of hard to reach places!

Consider this extendable torch your all-in-one answer to examining nooks and crannies you wouldn't otherwise be able to see. Length-wise, it clocks in at just under 17cm in standard mode… but pull out its extendable neck and it stretches to a cool 54cm in total! The ideal length for peering into car engines or reaching down the back of the sofa! Plus, thanks to the magnet built in to the torch head, you can pick up metal items with it too - those pesky screws that disappeared under your work bench don't stand a chance!

A small click button on the head of the torch easily turns the torch's three super-bright white LEDs on and off, illuminating areas other torches can't hope to reach!

>> Telescopic flashlight with magnetic head – Designed to help you see into hard to reach places and pick up small metal items (e.g. keys, screws etc)
>> Length: 16.7cm in standard mode / 54 cm when extended
>> Matt black aluminium body
>> 3 x super-bright white LEDs
>> Powered by 4 x LR44 batteries (included)

Item Weight(in kg):	0.098
