Black Diamond

BLKDIA

The spherical MFI (Made for iPhone) Black Diamond is so much more than your average phone charger – simply slip in an iPhone and it comes to life as a gorgeous, sound-sensitive mood lamp!

The Black Diamond is a truly modern mood lamp. After downloading the free Black Diamond launch app, you'll be able to choose between a range of lighting effects – Plasma, Breath, Rainbow, Lightning, Flames. Slot your iPhone into the dock and watch as the colours glow through the shadowy Black Diamond! Want to change the light setting? Simply tap the diamond twice and the built-in sound sensor will activate the next mode; tap again until you’re happy with the setting chosen. The dock will even simultaneously charge your phone while it shows off its colour-changing abilities.

The Black Diamond features both a sleep and an alarm function, and finally, because the USB cable it comes with is specifically designed to work with iPhones, you can even use it to synch your handset with iTunes via your computer.
